

Pediatric and Adult Nutrition in Chronic Diseases, Developmental Disabilities, and Hereditary Metabolic Disorders *Prevention, Assessment, and Treatment*

30% discount

Editors: Shirley W. Ekvall, PhD, FAAMD, FACN, RD, LD
and Valli K. Ekvall, PhD, RD, LD

- Completely revised and updated to reflect the most up-to-date understanding of the biochemical basis of chronic diseases, hereditary metabolic disorders, and developmental disabilities.
- Includes most recent recommendations for nutrient intake, physical activity, prenatal care, healthy body mass index (BMI) and more
- Expanded coverage of the aging special-needs population provides vital insight into this rapidly growing demographic

This fully revised and updated edition of *Pediatric and Adult Nutrition in Chronic Diseases, Developmental Disabilities, and Hereditary Metabolic Disorders* offers a comprehensive reference to nutritional interventions for diseases across the lifespan with experts on each chapter (MD or Ph.D.).

April 2017 | Hardback | 582 pages
~~\$125.00~~ **\$87.50**

Enriched with tables and charts, including unique growth charts, that distill the latest recommendations for nutrient intake, physical activity, this third edition is a convenient and essential resource for busy clinicians, researchers and students in nutrition, dietetics, and medical specialties.

A self-study guide with up to 35 CEU's (287 multiple choice questions) for dietitians, physicians, nurses, and other medical specialists will be available soon through Dr Ekvall, the editor, at shirley.ekvall@uc.edu.

Previous Editions

"This extremely well-referenced, broad-based text would be an excellent addition to a university or departmental medical library."

- Diane Bloomfield, M.D., American Journal of Clinical Nutrition

"... this is a most valuable book. The extensive appendices contain information that is otherwise difficult to find. This book should be in the library of every pediatric nutritionist and every clinic where children with chronic disease are cared for."

- William B. Weil, M.D.--New England Journal of Medicine

Table of Contents

Part I: Preventive Nutrition

A. Nutrition and Growth

1. Prenatal Growth in Pregnancy
 2. Postnatal Growth in Infancy
 3. Problems of Prematurity
- ### **B. Nutrition Evaluation**
4. Nutritional Assessment—All Levels and Ages
 5. Community-Based Nutrition Services and Resources
 6. Nutritional Support Following Injury
 7. Sports Nutrition for Children
 8. Vegetarian Diets Across the Lifespan

Part II: Chronic Diseases and Intellectual and Developmental Disabilities

A. Neurological and Developmental

9. Cerebral Palsy
10. Seizures and Epilepsy
11. Myelomeningocele
12. Nutrients, Neurotransmitters, and Brain Dysfunction
13. Autism Spectrum Disorders
14. The Fetal Alcohol Syndrome
15. Down Syndrome
16. Prader-Willi Syndrome
17. Rett Syndrome

B. Behavioral and Eating Disorders

18. Obesity
19. Attention Deficit Hyperactivity Disorder
20. Failure to Thrive
21. Rumination
22. Anorexia Nervosa, Bulimia Nervosa, and Eating Disorders
23. Lead Toxicity and Pica

C. Feeding Disorders

24. Feeding and Eating Problems of the Child and Adult with Intellectual and Developmental Disabilities and Special Healthcare Needs
25. Cleft Lip and/or Cleft Palate and Other Craniofacial Anomalies

D. Drugs

26. Botanicals in Pediatrics to Adults
 27. Drug Therapy and Nutrition
- ### **E. Miscellaneous Chronic Diseases**
28. Allergy and Immunological Disorders in Children
 29. HIV Infection
 30. Juvenile Rheumatoid Arthritis

31. Children with Cancer
32. Congenital Heart Disease and Lipid Disorders
33. Chronic Renal Disease in Children/Adults
34. Sickle Cell Anemia
35. Gastrointestinal Disorders of Infancy and Childhood (with Nutrition Support and Probiotics)
36. Constipation and Fiber

Part III: Hereditary Metabolic Disorders

A. Disorders of Amino Acid Metabolism

37. Homocystinuria
38. Maple Syrup Urine Disease
39. Phenylketonuria and Maternal Phenylketonuria
40. Tyrosinemia
41. Urea Cycle Pathway

B. Organic Acidemias

42. Methylmalonic Acidemia and Propionic Acidemia
43. Isovaleric Acidemia and 3-Methylcrotonyl Glycinuria
44. Glutaric Acidemia Type I and 2-Ketoadipic Acidemia

C. Fatty Acid Oxidation Disorders

45. Adrenoleukodystrophy and Other Peroxisomal Disorders
 46. Mitochondrial Fatty Acid Oxidation Defects
 47. Mitochondrial Disorders
- ### **D. Disorders of Carbohydrate Metabolism**
48. Type I and Type II Diabetes
 49. Galactosemia
 50. Lactose Intolerance

51. Disorders of Fructose Metabolism
52. Glycogen Storage Diseases

E. Miscellaneous Genetic Disorders

53. Rubinstein-Taybi Syndrome
54. Celiac Disease
55. Cystic Fibrosis and Bronchopulmonary Dysplasia
56. Fragile X Syndrome
57. Hyperuricemias (Lesch-Nyhan Disease)
58. Williams Syndrome
59. Wilson's Disease
60. Nutritional Aspects of Birth Defects
61. Nutrition in the Elderly
